

## ASSIGNMENT – 2

**1)Build a python code, Assume u get temperature and humidity values (generated with random function to variable ) and write a condition to continuously detect alarm in case of high temperature.**

### CODE:

```
import random

import time

while (1):

temp = random.randint(0, 100)

humidity = random.randint(0, 100)

if temp>60:

print("ALERT!!! temperature: "+str(temp)+"°C")

time.sleep(1)

print("ALERT!!! humidity: "+str(humidity)+"% ")

time.sleep(1)
```

# Output:

```
main.py
1 import random
2 import time
3
4 while (1):
5     temp = random.randint(0, 100)
6     humidity = random.randint(0, 100)
7     if temp>60:
8         print("ALERT!!! temperature: "+str(temp)+"°C")
9         time.sleep(1)
10        print("ALERT!!! humidity: "+str(humidity)+"%")
11        time.sleep(1)
12
13
14
15
16
```

input

```
ALERT!!! humidity: 2%
ALERT!!! temperature: 95°C
ALERT!!! humidity: 83%
ALERT!!! temperature: 97°C
ALERT!!! humidity: 70%
ALERT!!! temperature: 69°C
ALERT!!! humidity: 47%
```
